

No.D-6535 Oyatsu DE SE II

Fluorine-coated takoyaki maker with 14 holes

Please read these precautions before use and store it carefully after reading. Improper handling may lead to accidents.

▲ Handling precautions

- This is a cooking mold for gas stoves only. It cannot be used with other heat sources or gas stoves with Si sensors (an automatic shutoff safety function found in Japanese gas stoves).
- Before initial use wash the pan with dishwashing detergent and rinse.
- Keep out of the reach of small children. The body may become hot during use or immediately after use and may cause burns.
- The bottom surface is uneven so make sure it is stable before using the pan. If used in an unstable state it may fall and cause burns or injuries.
- Do not over heat the empty pan. It may cause fire, deformation of the body or burns. In addition, excessive heating may shorten the life of the coating.
- Use at medium heat or lower.
- The handle is made of metal. Use cooking mitts etc. as the product may become hot and cause burns.
- Do not use metal cooking utensils as they may damage the coating. Use wooden or plastic utensils.
- Do not use steel scrubbers or abrasives. This may cause the coating to peel off.
- Avoid chopping ingredients on the surface of the coating.
- Avoid using acidic substances such as acids or alkaline substances such as baking soda.
- After cooking, transfer the food to another container.
- After use, allow to cool before washing. Wipe off the water as soon as possible as leaving the product with water on it may cause rust.
- Avoid using a dishwasher or soaking the product in water. This may cause rust.
- If the coating surface is scratched or peeled off, it may cause rust. If rust occurs, wash off the rust and apply a thin layer of oil before storing.

▲ Care instructions

- When removing burnt on marks, do not use scourers or hard metal objects. Soak in hot water to soften burnt parts before removing.
- After use, apply dishwashing detergent, wash thoroughly with a sponge, etc., wipe off water as soon as possible and dry.
- Leaving dirt containing salt or acid on the product or storing it in a humid place may cause rust.
- Do not leave the product in contact with dissimilar metal products such as stainless steel or iron as this may cause rust.

▲ Specification

Product size (approx.) / Width 235 x Depth 210 x Height 30

Surface treatment / Inner surface: Fluorine resin coating

Outer surface: Baked paint

Material type / Body: Aluminum alloy

*This product is for general household use. Do not use for commercial purposes.
